Due to the outbreak of DOWNY MILDEW there will not be any impatiens or double impatiens sold. A few stores may sell impatiens, but local growers will not sell it as the chances of its survival on Long Island are very slim. Continuing to plant impatiens may prolong the effect of this disease. This fungus only affects impatiens and double impatiens. **Sun impatiens***, **New Guinea impatiens***, **flowering vinca*** and **other plants are NOT AFFECTED by this fungus.** Other alternatives you may wish to consider are wax begonias, petunias and marigolds. We will be glad to help you in any way we can with information about plants.

Thank you,
 The Ladies Aide

ALTERNATIVES TO IMPATIENS

*”**Sun impatiens**” thrives in **full sun or part shade**. They are unaffected by downy mildew and are more vigorous than New Guinea impatiens. This was a big seller last year.

*”**New Guinea impatiens**” thrive in **sun or part shade**. They flower until the first frost and require good watering.

*”**Flowering Vinca**” flowers from late May until frost. It thrives under **sunny, hot, dry conditions**. The flower looks like impatiens flower. This was a big seller last year.

*”**Begonias**” flower spring thru fall in **part shade to full shade**. Great for borders.

*”**Bounce Impatiens**” Does well in the shade. Bounces back quickly if it starts to wilt when in need of watering.

*****8’ AND 10” HANGING BASKETS, 4 ½” and 6” POTS, some ADDITIONAL FLATS and MANDEVILLAS AVAILABLE FOR SALE May 9th – 11th .**
